Summary:

These data were developed in order to establish a preserve design for the East County MSCP (ECMSCP). This is a draft dataset and is not considered final.

Feature Type: Polygon

Number of Records: 9589

Publication Date: 2009-02-01

Date of Data (Temporal Period Extent): 2009-02-01

Extent: East County Draft Subarea, County of San Diego

Extent in Longitude Latitude

North 33.432668
West -117.052335 **East** -116.080309
South 32.567366

Extent in the item's coordinate system

North 2101055.999617
West 6316881.000648 **East** 6613437.000025
South 1787146.844664

Description:

This map depicts the draft East County MSCP plan. The San Diego County Board of Supervisors established the Multiple Species Conservation Program (MSCP) in October 1997 as an integral part of the County's efforts to protect parks and open space. The protection of sensitive plant and animal species by the MSCP eliminates the need to list the species as endangered under Federal and State Endangered Species Acts and reduces the costly permit process for private landowners and public agencies. The goal of the MSCP (a 50-year program) is to maintain and enhance biological diversity in the region and maintain viable populations of

endangered, threatened, and key sensitive species and their habitats. Not only are endangered and threatened species protected by the MSCP, but the residents of the community will benefit from this preservation of the natural environment as well. Planning a preserve system for the East County region also promotes regional economic viability through streamlining the land use permit process - a significant benefit to landowners. The MSCP is a cooperative effort among the County and other local jurisdictions and the U.S. Fish and Wildlife Service and the California Department of Fish and Game (the Wildlife Agencies). These public partners are working with various private landowners, conservation groups, and community planning groups, developers and other stakeholders in assembling the preserve.

Process Description: Vegetation, land ownership, preserved lands and resource management status were combined and modeled to create a preserve design. This data was created by selecting major categories from the East County MSCP Analysis Map.

Data can be downloaded in shapefile format from the SanGIS Data Warehouse at <https://rdw.sandag.org/Account/Login>

Refer to SanGIS website (www.sangis.org) to obtain further information on mapping and data extraction services available from SanGIS.

Fields:

Overview:

Draft East County MSCP plan.

CSACODE is code associated with Conservation Designation
desc_ is description of Conservation Designation

__FID (OID)

Internal feature number.

Shape (Geometry)

Feature geometry.

CSACODE (Integer)

CSACODE is code associated with Conservation Designation

CSACODE, desc_ (description)

0, NULL

2, Agriculture or Natural Upland within FCA

3, Agriculture or Natural Upland outside FCA

80, Developed Lands

99, Baseline Preserve

100, RMS 1 - Highest Level of Ecological Protection

200, RMS 2 - Land managed with Ecological Protection

300, RMS 3 - Land managed as Open Space

400, RMS 4 - Other Public/Semi-Public Lands

500, Riparian/Wetland Habitat and Transition Zone within FCA

510, Riparian/Wetland Habitat and Transition Zone outside of FCA

599, Tribal Lands

desc_ (String)

desc_ is description of Conservation Designation (associated with CSACODE value).

CSACODE, desc_ (description)

0, NULL

2, Agriculture or Natural Upland within FCA

3, Agriculture or Natural Upland outside FCA

80, Developed Lands

99, Baseline Preserve

100, RMS 1 - Highest Level of Ecological Protection
