

SANDAG GIS

NAME: LU1986

DESCRIPTION: 1986 Land Use for the western half of San Diego County

FEATURE TYPE: Polygon

EXTENT: Western San Diego County

DATE OF DATA: CY 1986

NUMBER OF RECORDS: 9,434

MAPPING SOURCE: SANDAG, aerial photos

Notes:

Input for the Series 7 Regional Growth Forecast.

Not parcel based. Polygons digitized from USGS 15' quad mylars.

SANDAG's Land Layers are created for use in the Regional Growth Forecast to distribute projected growth for the San Diego region to suitable subareas in the region. These land layers include existing land use, planned land use, land ownership, land available for development, and lands available for redevelopment and infill. The land layers inventory is updated when new information is available.

Code Documentation:

LU	Land use code
LANDUSE	Land use description
SHAPE_area	Area of polygon in square feet
SHAPE_len	Length of polygon perimeter in feet

Codes used in 1986 which have more detailed codes in more recent land use layers:

LU	LANDUSE
1400	GROUP QUARTERS
