### Notes:

SANDAG's Land Layers are created for use in the Regional Growth Forecast to distribute projected growth for the San Diego region to suitable subareas in the region. These land layers include existing land use, planned land use, land ownership, constraints to development, land available for development, known site-specific developments, and lands available for redevelopment and infill. The land layers inventory is updated when new information is available.

Road right-of-way polygons and privately owned land are not part of this ownership layer.

Adjacent parcel polygons with the same ownership have been aggregated (dissolved) into a single feature.
