

SANDAG GIS

NAME: OWN

DESCRIPTION: Current Public Land Ownership

FEATURE TYPE: Polygon

EXTENT: San Diego region

DATE OF DATA: 2009

NUMBER OF RECORDS: 6,697

MAPPING SOURCE: SANDAG, County Assessor's Master Property Records file, Cleveland National Forest, Bureau of Land Management (BLM), State Parks, other public agency contacts, SanGIS landbase (coordinate registration) and local agency review

Notes:

SANDAG's Land Layers are created for use in the Regional Growth Forecast to distribute projected growth for the San Diego region to suitable subareas in the region. These land layers include existing land use, planned land use, land ownership, land available for development, and lands available for redevelopment and infill. The land layers inventory is updated when new information is available.

Many of these data sets are built from the San Diego Geographic Information Source (SanGIS) landbase. The land use information has been updated continuously since 2000 using aerial photography, the County Assessor Master Property Records file, and other ancillary information. The land use information was reviewed by each of the local jurisdictions and the County of San Diego to ensure its accuracy. Although this inventory contains more categorical detail and has better positional accuracy than previous land use inventories, users should be aware that this data may be too generalized for some local planning projects.

Road right-of-way polygons and privately owned land are not part of this ownership layer.

Adjacent parcel polygons with the same ownership have been aggregated (dissolved) into a single feature.

Code Documentation:

OWN	Public land ownership code
OWNERSHIP	Public land ownership description
AREA	Area of polygon in square feet
LEN	Length of polygon perimeter in feet
