National Forest, Forest Service, Boundary, Region 5, Pacific Southwest Region, Proclaimed, San Diego County

Summary:

Land owned by the U.S. Forest Service within San Diego County. Ownership was determined by comparing County of San Diego Tax Assessor parcel ownership with known public, tribal, and existing Forest Service lands.

Feature Type: Polygon

Number of Records: 1

Publication Date: 2017-01-27

Date of Data (Temporal Period Extent): 2017-01-27

Extent: publication date San Diego County

Extent in Longitude Latitude

North 33.507669
West -117.511779 **East** -116.344843
South 32.647166

Extent in the item's coordinate system

North -497663.299776
West 233692.212047 **East** 339834.602629
South -589618.049664

Description:

This feature class consists of County of San Diego Tax Assessor parcel boundaries that are either owned or managed by U.S. Forest Service. These parcels were to dissolved to form a single feature that represents ownership and management by the United States Forest Service (USFS) at the parcel level. This layer should be used for cartographic purposes and aid in planning, development, and land use analysis decision making for The County of San Diego.

Distribution Ordering Instructions:

Data can be downloaded in shapefile format from the SanGIS Data Warehouse at <https://rdw.sandag.org/Account/Login>

Refer to SanGIS website (www.sangis.org) to obtain further information on mapping and data extraction services available from SanGIS.

Fields:

Overview:

The NTL_FOREST layer contains the following fields:

FORESTNUMBER: Unique number for each forest in Region 5

FORESTNAME: Unique name of the Administrative Forest.

REGION: Unique number for Forest Service administrative regions.

GLOBALID: Global unique ID?

ADMINFORESTID: Control Number generated by Oracle to uniquely identify each exterior boundary area across all Forest Service units.

Citation:

None

__FID (OID)

Internal feature number.

FORESTNAME (String)

Unique name of the Administrative Forest.

ADMINFORES (String)

Control Number generated by Oracle to uniquely identify each exterior boundary area across all Forest Service units. The value is brought from Oracle and used as a unique identifier for each spatial feature. It is used to join each administrative boundary feature to the corresponding row in the Oracle view, ADMINISTRATIVE_BOUNDARIES, by matching with the column CN in that view.

REGION (String)

Unique number for Forest Service administrative regions.

FORESTNUMB (String)

Unique number for each forest in Region 5.

SHAPE (Geometry)

Feature geometry.

Shape_Area (Double)

Area of feature in internal units squared.

SHAPE_LEN (Double)

Shape length in internal units
