

Schools 2022

Tags

schools, public schools, private schools, elementary schools, middle schools, high schools, SANDAG, SANDAG Data Solutions, San Diego, San Diego County, San Diego region, school enrollment, enrollment, students

Summary:

This feature class contains public and private school sites, specifically primary, secondary, and adult schools. The feature class is intended for mapping and general analysis purposes

Feature Type: Point

Number of Records: 1030

Publication Date: 2023-03-08

Date of Data (Temporal Period Extent): 2021-09-01

Extent: San Diego region

Extent in Longitude Latitude

North 33.416777
West -117.575105 **East** -116.295440
South 32.543296

Extent in the item's coordinate system

North 2095276.920000
West 6157301.040000 **East** 6547663.788500
South 1780000.571750

Description:

The types of data in this feature class are school names, spatial locations, addresses, and additional school details (e.g. status of operation, whether the facility is private or public, etc.). School addresses were sourced from the California Department of Education (CDE) and were geocoded using the SanGIS parcels and street centerlines. The attributes from previous School iterations were also updated using aerial imagery, online research, site visits, and over-the-phone verification. Certain points were manually relocated to school buildings.

Online Ordering Description:

Downloadable as a Shapefile from <https://rdw.sandag.org>

Fields:

Overview:

Public and private grade school sites. Includes elementary, middle, and high schools. Intended use is for mapping and general analysis purposes.

Citation:

File Structure: Public Schools Database

<http://www.cde.ca.gov/ds/si/ds/fspubschls.asp>

__FID (OID)

Internal feature number.

cdsCode (String)

This 14-digit code is the official, unique identification of a school within California. The first two digits identify the county, the next five digits identify the school district, and the last seven digits identify the school.

schoolID (Integer)

Internal school facility identification code for the purposes of joining to SCHOOLPOLY school polygon data (for validation purposes) and tracking CDS codes with multiple locations.

district (String)

School district name.

city (String)

The city where the school is physically located.

name (String)

School name.

addr (String)

The street address of a school.

zip (String)

The 5-digit ZIP code,

openDate (Date)

The date the school opened. If the start date precedes July 1, 1980 (the date the California Department of Education began maintaining this information), or if the start date is unavailable (in the case of some private schools), then "7/1/1980" is assigned as a value.

charter (String)

This field identifies charter schools.

docType (String)

The District Ownership Code Type is the text description used to identify the Administrative Authority.

socType (String)

The School Ownership Code Type is the text description of the type of school.

gsOffered (String)

The "grade span offered" field displays the range of grades offered or supported by a school from the lowest grade to the highest grade.

priv (String)

The private school indicator field contains binary data that indicates whether a school is public (N) or private (Y).

shrtName (String)

This field contains a truncated version of school names.

Shape (Geometry)
Feature geometry.
